

The **L186DRS** LED High Definition television

The mobile leisure industry has been growing in popularity for a number of years and many manufacturers have been scrambling to keep up with the changes, or get in on the action. One manufacturer in particular, however, has been ahead of the game all along. Avtex has always known the direction in which the industry was headed and has been there to meet it for over two decades.

Avtex has been specialising in low voltage audio/visual products for the leisure industry for over 25 years, creating electronic merchandise for caravan, motor home and boat use.

One such example is the **L186DRS** LED High Definition television. This product is worth a serious look. With a generous 18.5" screen, it is hard to believe that Avtex has crammed so much into such a compact and stylish unit.

The **L186DRS** was specifically designed for mobile leisure use. With its specially designed circuitry, the **L186DRS** was engineered for 12v/24v/240V power, making it ideal for motor home use, and even around the home. Unlike many manufacturers who claim their electrical products are suited for mobile leisure use, the Avtex **L186DRS** was conceived with sturdy circuitry to withstand the fluctuation of the Direct Current of caravans and motor homes.

Another great feature of the **L186DRS** is that while it sports an ultra-slim design, it incorporates the latest DVB-S2 and DVB-T2 Digital technology built in, giving you additional High Definition channels through your satellite dish or aerial. The **L186DRS** is Wall mountable VESA standard to provide more stability and room and the latest Avtex brackets are light-weight and even lockable for transit and has a security feature to ensure your TV is safe when you are away from your vehicle (you need to provide your own padlock to take advantage of this feature).

The **L186DRS** has an AQT one-button tuning system, making it easy to find your favourite channels quickly. It also has a built in DVD player so you can take your favourite films with you on your holiday or journey. You will absolutely love the Pause/playback live TV/Instant record to USB on both Satellite and TV features of the **L186DRS** that allow you to record favoured shows to USB to watch again later on. The **L186DRS** even has an on-screen indicator to warn you when your battery is running low.

When searching for an LED HD widescreen, compact television for your boat, caravan, or motor home, the Avtex **L186DRS**, which comes with a three-year warrantee, is the ideal set that will do all you expect and more.
